

## MX Ultimate Defense<sup>SM</sup> Pricing

The MX Logic<sup>®</sup> Email Defense Service offers far more than traditional spam prevention, by providing complete email defense using a combination of proven spam filters, leading anti-virus engines, fraud protection, content filtering, and email attack protection. Our network perimeter-based service identifies, quarantines, blocks and strips suspect email messages before they can enter or leave your organization's messaging infrastructure.

### MX Ultimate Defense<sup>SM</sup> Starting from \$2.25 per user per month

This is MX Logic's most comprehensive package of protection that includes precise spam blocking, virus and worm scanning, sophisticated filtering of unwanted and malicious content and attachments for inbound email, and unique email infrastructure protection that conceals your messaging network, protecting you from denial of service attacks, email bombs and other harmful email attacks.

This package also includes outbound message filtering, which is ideal for organizations looking to protect the integrity of information leaving the corporate network, an advanced administrative and reporting portal, and sophisticated end-user and administrator quarantine management. And, with the MX Logic<sup>®</sup> Fail Safe Disaster Recovery Service, this package is perfect for those organizations that cannot afford to ever lose an email.

### MX Ultimate Defense features

With the MX Ultimate Defense package, your business will benefit from the following MX Logic Email Defense Service features:

- **Advanced Spam Blocking** Eliminates 90% of spam costs by blocking over 99% of spam using our patent-pending Stacked Classification Framework<sup>®</sup> spam detection system that combines the most effective spam-fighting filters and techniques in the industry, including award-winning Symantec Brightmail AntiSpam<sup>™</sup> technology. This multi-layered framework separately assesses and "votes" on the probability that an email is spam. Because each filtering method has unique strengths designed to identify specific threats, the combination creates one of the most accurate and comprehensive filtering processes in the industry.
- **Triple Virus and Worm Scanning** Provides your organization with MX Logic's proprietary WormTrac<sup>SM</sup> detection technology, which identifies and intercepts zero-hour mass mailing worms before they enter or leave a corporate network, and three industry-leading signature-based anti-virus engines.
- **Email Attack Protection** Conceals your network and critical messaging gateways from attack. Instantly blocks denial of service and other SMTP-based attacks, including dictionary harvest attacks, email bombs and channel flooding.
- **Fraud Protection** Keeps your employees safe from the risks of fraud and phishing scams.
- **Sophisticated end-user and administrator quarantine management** MX Logic's safe, external quarantine and email-based quarantine reporting process significantly reduces email administration and false positives (legitimate email misidentified as spam).
- **Content and Attachment Filtering** Reduces corporate liability and risk through intelligent message processing that identifies, quarantines and blocks unwanted, malicious and sensitive content and attachments.
- **MX Logic<sup>®</sup> Outbound Message Filtering** Proactively protects your clients from harmful viruses and worms, and enforces your corporate email policy by filtering out specific content and attachments in messages leaving your corporate network.

### Key Benefits

- Eliminates over 90% of spam costs by blocking over 99% of spam
- Comprehensive virus and worm protection
- Frees up IT resources
- No migration or integration necessary
- Simple, effortless activation
- Easy group policies management
- Secure message delivery via Transport Layer Security (TLS)
- 99.99% service availability guarantee

### Award-winning

Our innovative service was honored as the Best Managed Email Service in the 2006 SC Magazine Reader Trust Technology Awards, and was selected as a 2005 Product of the Year by SearchExchange.com. In addition, the Email Defense Service was awarded the highest available rating of five stars in the VeriTest Anti-Spam Benchmark Service Summer 2005 Report, in the vendor-tuned portion of the test.

### Additional service features

One of the industry's most comprehensive email defense solutions, this package also includes support and services to help you keep your overall email network reliable and running efficiently. With this package, you'll also benefit from:

- **MX Logic® Fail Safe Disaster Recovery Service** Incorporates complete back-up protection for your email server in case of an unforeseeable outage or malfunction, or during planned maintenance.
- **Automated, around-the-clock email monitoring and protection** MX Logic's Threat Center is a sophisticated streaming data environment where MX Logic monitors the global state of email communication, 24 hours a day, seven days a week, and provides its customers with real-time updates and protection.
- **Secure message delivery** Organizations that require a greater level of security for inbound and outbound email traffic can feel confident in MX Logic's Transport Layer Security (TLS) protocol. MX Logic accepts and filters encrypted inbound and outbound messages and delivers them across a secure tunnel when recipients are TLS enabled. If a recipient is unable to receive a TLS encrypted tunnel, MX Logic will deliver the message via standard SMTP.
- **Centralized, policy-based administration** Gives organizations the flexibility to establish email protection policies, set domain-level rules, enable group filtering policies, and decide which type of email should be allowed and which should be denied – all using one centralized web-based tool.
- **Account provisioning and configuration support** The MX Logic Provisioning team will work with you to activate and configure your account.
- **Dedicated customer service** The MX Logic Customer Service team is available to answer your account and billing questions via a toll-free phone number from 6 a.m. to 7 p.m. Mountain Time, Monday through Friday, or anytime via online eService. If your request is received outside of these hours, a service representative will contact you the next business day.
- **Around-the-clock technical support** The MX Logic Technical Support team is available to answer your technical questions via a toll-free phone number from 6 a.m. to 7 p.m. Mountain Time, Monday through Friday, or anytime via online eService. Technical support is available outside of business hours for service-debilitating issues.
- **Comprehensive reference manuals** MX Logic customers can download administrator and end-user reference manuals for help with activation, configuration, administration and reporting.

### About MX Logic

MX Logic Inc. provides innovative, easy-to-use email defense solutions to businesses of all sizes. Processing billions of messages each month for over 7,600 organizations worldwide, MX Logic distributes its email security and protection solutions directly and through an extensive partner network. For more information, visit [www.mxlogic.com](http://www.mxlogic.com).

**IN 2005, SMBS REPORTED THAT THEIR TOP THREE MESSAGING PRIORITIES WERE SPYWARE, SPAM, AND VIRUSES.**
